

Reception News: Friday 18th November 2022

This week has been very busy at St. Oswald's with Anti-Bullying Week, Road Safety Week and Maths Week all happening at the same time!

As part of Anti-Bullying Week the children have been showing lovely acts of friendship and have created a 'good friend' recipe in groups. They had some brilliant ideas!

For Maths Week the children have been playing team games with hoops and bean bags to help them learn the composition of numbers to 5. They even worked on recording their own answers through pictures, tallies and numerals.

On Thursday we had a day focusing on Road Safety Week. The children visited the pedestrian crossing outside of school and crossed the road. When they returned back to school, the children discussed how they can be safe pedestrians. What a busy but very fun week!

PCSO Visit

Today our local PCSO' visited Reception to support our road safety work this week and to talk about her role in helping the local community. The children had a fun time asking questions about her job and they even got the chance to explore her police car!

A big thank you to PCSO Georgina for taking the time out of her busy day to support the children in their learning.

Snacks

As a healthy school we do promote healthy eating with the children. Please think carefully about the snack your child brings to school. We ask that children do not bring cake, biscuit or chocolate based snacks. If anyone is experiencing any issues with snacks, please let me know.

Thank you for supporting St. Oswald's in promoting healthy eating.

Congratulations!

Harry is star of the week for his lovely manners.

Henry is our Reading Owl for his super reading at home.

Road Safety Week

We visited the pedestrian crossing outside school, crossed the road safely and walked to the post box to post a very special invitation for our Christmas Play to someone we really want to attend....Miss Lennon!

A Maths game to learn about the composition of numbers to 5.

Making spirals with playdough to help our hand and finger muscles to get stronger and to learn how to create a bendy shape.

Saying a Baptism prayer to celebrate the end of our RE topic.
