

# St Oswald's Year 2: Weekly Update

26th September - 30th September 2022

Hello,

We've had another busy and exciting week in Year 2 as we continue with our 'Touch the Future' curriculum. I've put a few of the highlights below.

## Art

It was the week of sketching in art, the children were using pencil to create texture in their drawing. They were given a selection of teddies to use as subjects for their sketches.

### Adding on adding on adding

The children were showing off their skills at adding three single digits together and presenting their answers on a number fan. I was very impressed with their quick mental maths!

## Computing

This week in computing the children were using the wait function to stop commands from being executed straight away. They had lots of fun programming the magician to make a bunny appear!

(Damp) PE!:

We needed more space this week for this week's PE activity so we ventured out onto the junior playground. The class had a great time working on their reaction and agility even if they did get a little wet with sporadic rain!

Science:

This week the children had the task to investigate the best material to build a hamster cage out of, by scratching different materials. They decided that metal and plastic would work best!

## Dodgeball

The children have enjoyed learning different skills that will help their dodgeball ability. We had a mini wall of danger competition this week with team Learn coming out on top!

## History

The children learn how the Great Fire of London started and spread this week. They had a go at acting out some of the notable sections of the fire including; using fire hooks, The Tower of London escaping the flames, and people passing their belongings onto boats.

Thank you for all the support that you give at home.

All the best,

Mr Coppenhall
