

Y6 Class News 7th – 11th November

Hello again, this week has been another great week in Year 6. The children have been the best ambassadors for our school when chatting to visitors to the school and potential parents alike. They are also working well together as a team as they look out for and look after each other.

This week, the children have continued working on Maths lessons by completing some Fluent in Five questions which aims to improve the children's arithmetic skills by answering 5 SATs style arithmetic questions in just 5 (and sometimes I've only allowed them 4 ½) minutes. In RE the children devised their own personal mission statements about what they could do to make our world a better place and have written wonderful thoughtful responses. In Design and Technology, we have been investigating the best way to create patterns for our decorations that we will be sewing later in the half-term. If you have scraps of fabric, felt or ribbons etc. that you are willing to donate to school these will be greatly appreciated.

As you can see we have been very busy, as always, because this is just a snippet of the things that we have covered this week. Next week is National Maths Week in England. This was set up with the goal of ensuring that no children miss out on the opportunities that being a confident mathematician can give them. Last year, it became the largest national maths festival in the world. We will have lots of fun and have exciting challenges for the children to complete so look out for details of exactly what the children did in next week's blog.

Have a wonderful weekend,

Mrs Crook.
