

Year 4's Class News (Week beg 13th February 2023)

This week we have finished our art topic on painting using light and dark. We completed our topic by sketching our still life sport's equipment choices and spent Wednesday afternoon practising the different painting techniques.

Here a few photos:

On Monday, we were delighted to take part in a Design Technology workshop on structures. We were shown how to make triangles into tetrahedrons, then octohedrans using large pieces of dowling and elastic bands, before puttting them altogether to make a huge structure. We were completely amazed that we were able to collaboratively make such an impressive structure.

After an excellent half term of exciting topics and learning, the children have made great progress and taken part in everything they have done enthusiastically. I wish you all a happy half term break of enjoyment, rest and relaxation.

Kindest regards,

Mrs Neiland
