

Year 6 class News 23rd-27th January

Dear Year 6 parents,

This week has whizzed by and we have been busy fitting in lots of learning!

In maths we have all worked with our big maths group leaders to develop key skills as well as continuing work on fractions. The whole class has mastered multiplying and dividing fractions and simplifying. Great work Year 6!

We are almost at the end of our writing unit about Charles Darwin and evolution and today the children have planned their own independent non-chronological report which they will write next week to showcase their learning. I cannot wait to see their finished writing and to share it with you.

In Science we have had great fun investigating the theory of survival of the fittest. We used different equipment as beaks to pick up seeds to find out which type of bird would have most chance of survival.

In our Art lesson we moved on from graffiti art to explore the art work of Käthe Kollwitz.. The children then used charcoal to draw portraits with exaggerated facial features to express emotions.

In PE this week and next week we are preparing for the finals of the school's athletics tournament. Thank you for sending your children in looking so smart in their PE kits. Please could I ask that you check names are written in sweatshirt labels and also that your child has not accidentally picked up another child's sweatshirt - a navy, small adult size sweatshirt was lost last week.

A huge thank you for the time spent at home supporting reading, looking at Big maths folders, practising spellings and completing home learning. It is hugely appreciated.

Please don't hesitate to get in touch if there is anything I can help with.

Thanks 😊

Mrs Thomason
